KÖRBER

Get to know our TFM pre-roll maker

TFM
Tube Filling Machine

Output: 80 pre-rolls per minute

Principle: automatic filling of cylindrical pre-manufactured filter tubes with automated end closing

Hemp/cannabis | Tube | Pre-roll

Key features

- Able to handle ‘sticky’ cannabis
- Production of small batches possible
- Low waste level of material
- Homogeneous filling
- No installation required (ready-to-use machine)
- Household power supply
- Light hemp-paper tube can be used
- Automatic closing of lit end by folding not twisting
- Use of locally made and standard tubes
- Easy weight change possible
- Easy to clean

Pre-roll maker

(cylindrical products)

	Tube Filling Machine (TFM)	Cantos	Nano-H
Required material	Pre-manufactured filter tubes	Cigarette paper / filter paper / filter / glue	
Filler material	From pure flowers to shredded hemp/cannabis	From pure flowers to shredded hemp/cannabis blends and reconstituted hemp paper	
Required infrastructur	Normal household environment	Normal household environment	Industrial environment
Footprint	1.25 m^2	< 10 m^2	36.84 m^2
Output in pre-rolls per minute	80	150	5,000
Diameter flexibility	Medium	Medium	Low
Flexibility in product design: total length, filter lenght	High	High	Medium
Lid end closing	Open & folding	Open	Open – densed end
Cleaning effort (for all types of material)	Low	Low–medium	Medium
Number of operators required	1	1-2	1-2
Required skill level for operators	Low	Medium	High
Investment	€	€€	€€€
Production costs savings per pre-roll compared to manual process: $$$*	$ per pre-roll*	$ per pre-roll*	$ per pre-roll*
